

# Lyxor ETF DJ Stoxx 600 Utilities

The best way to reflect European sectors

April 30 2008

## Exchange Traded Fund

### Lyxor ETF DJ Stoxx 600 Utilities

Lyxor ETF DJ Stoxx 600 Utilities is a French Mutual Fund (FCP), UCITS compliant, listed and tradable on Stock Exchanges. It reflects the evolution of the DJ Stoxx 600 Utilities index

#### Risk factor (extraction from the prospectus)

Exchange risk, since the index, calculated in EUR, is composed of shares expressed in the local currencies.

The Fund's NAV and trading prices could react to securities markets movements. Investors may lose money over short periods due to fluctuation in the Fund's NAV and trading prices in response to market movements and over longer periods during market downturns. The Fund is entirely exposed to the Index, therefore the Fund is exposed to 100% of market risks linked to movements in equities comprised in the Index. Unit holders are thus exposed to risks associated with any declines in the movements of Index Securities. The Fund therefore carries a high equity risk profile.

#### Exchange Traded Funds (ETFs)

ETFs are index-linked funds tradable in real time during European market hours as easily as any ordinary shares. Their objective is simple: to replicate as perfectly as possible the performance of an index or of a selection of stocks. These products are easily accessible and flexible. Their numerous strategic applications make them the perfect tool for all types of investors.

#### Lyxor Asset Management

December 31 2007

A wholly owned subsidiary of Societe Generale, Lyxor AM, management company belonging to the Corporate Investment Banking arm of the group, manages EUR 72.6 billion and is specialized on 3 businesses: Alternative Investment, Structured Funds, Index Tracking. The company is one of the top players of the European ETF industry with more than EUR 21.6 billion under management. Lyxor ETFs are listed on 9 Worldwide Stock Exchanges and reflect Equity, Bond and Commodity markets.

This document is of a commercial and not of a regulatory nature. The product was the subject of a prospectus approved by the Autorité des Marchés Financiers in accordance with the Directive 2003/71/EC. This product was approved by the Autorité des Marchés Financiers (visa n° FCP20060613 on July 7, 2006) and is the subject of a prospectus available on simple request from Lyxor AM or on [www.lyxoretf.com](http://www.lyxoretf.com). We recommend that investors refer to the « risk factors » section of the prospectus.

The accuracy, completeness or relevance of the external information provided is not guaranteed although it has been drawn from sources believed to be reliable

The information presented in this document is based on market data at a given moment and may change from time to time.

Prior to any investment in the product, you should make your own appraisal of the risks from a legal, tax and accounting perspective, without relying exclusively on the information with which you were provided, by consulting, if you deem it necessary, your own advisors in these matters or any other professional advisors. Subject to compliance with legal and regulatory requirements, Lyxor AM and/or Société Générale may not be held responsible for the financial or other consequences that may arise from the investment in this product.

This product may be subject to restrictions with regard to certain persons or in certain countries under national regulations applicable to said persons or in said countries. It is your responsibility to ensure that you are authorized to invest in this product.

This product has no guarantee in capital. The attention of the investors is attracted to the fact that the redemption value of the ETF can be lower at any time than the amount initially invested. At any time, the price of the product can know an important volatility because of the evolution of the market parameters. Product prices can contain methods of adjustment or substitution to take into account the consequences of certain extraordinary events which can affect one or several underlyings of this products or, if necessary, the end of this products.

This product reflects the evolution of an index calculated in euro, but composed of shares expressed in the local currencies. The investment can thus be sensitive to exchange risk between euro and these local currencies.

The figures relating to past performances refer to past periods and are not a reliable indicator of future results. The potential return may also be reduced by the effect of commissions, fees or other charges (ex: taxes, brokerage commission or the other commissions taken by the financial intermediary).
